MUNEEB UD DIN

Full Stack Developer | React · Next.js · TypeScript · Python (FastAPI) · Supabase
Rawalpindi / Islamabad, Pakistan • 0336 5372377 • muneebuddin.zamir@gmail.com
Portfolio: muneebuddinzamir-bit.github.io • GitHub: github.com/muneebuddinzamir-bit • linkedin.com/in/muneeb-ud-din-0258a235

Professional Summary

Full Stack Developer who builds web apps end to end: React, Next.js and TypeScript on the front end, and Python (FastAPI), Supabase and PostgreSQL on the back end. Currently a Junior Front-End Developer building a Next.js dashboard from Figma designs and REST APIs. Projects include a live full-stack job tracker with auth, row-level security and unit tests, and an offline AI teddy bear (ESP32, Flutter, FastAPI, local speech and language models). I test across browsers and devices, document my work, and can explain every line of code I write.

Technical Skills

- **Languages:** HTML5, CSS3, JavaScript (ES6+), TypeScript, Python, SQL.
- **Frameworks:** React.js (components, props, state, hooks), Next.js, Tailwind CSS.
- **Figma-to-Code:** Turning Figma designs into responsive layouts with accurate spacing and typography.
- **UI Components:** Tables, forms, cards, modals, and navigation, built as reusable components.
- **Responsive & Cross-Browser:** Flexbox, CSS Grid, mobile-first design; testing on Chrome, Firefox, and Edge.
- **APIs:** Fetching and displaying data from REST APIs with loading and error states.
- **E-commerce & CMS:** Shopify (Liquid theme sections, templates, Shopify CLI), WordPress (Elementor, custom CSS); static site deployment on Cloudflare Pages.
- **Tools:** Git, GitHub, VS Code, npm, Chrome DevTools, Vitest, Docker, Vercel.
- **Back-end:** Python (FastAPI), Supabase (PostgreSQL, auth, row-level security), SQLite, REST APIs, WebSockets.

Professional Experience

Junior Front-End Developer — Fusion Tech Dynamics, Islamabad *Jan 2026 – Present*

- Build responsive pages for an internal Next.js dashboard, turning Figma designs and tickets into working UI.
- Implement dashboard sections with tables, forms, cards, and navigation, using clean and reusable React components.
- Match spacing, typography, and layout from Figma across desktop, tablet, and mobile.
- Fetch and display data from REST APIs with proper loading and error states.
- Test pages across browsers and fix layout, responsiveness, and form validation issues.

Web Developer Intern — Volpea Solutions, Islamabad *2025 · 3 months*

- Developed website components in HTML, CSS, and JavaScript inside an existing production codebase.
- Joined cross-browser testing and debugging sessions and maintained clear change documentation for clean handoffs.

Freelance Front-End Work — Self-employed *2025 – Present*

- Took on freelance front-end tasks, building and styling responsive web pages for clients using HTML, CSS, JavaScript, and React.
- Turned client requirements and designs into clean, working layouts and delivered the finished code.

WordPress Trainee — Logics Buffer, Rawalpindi *2025 · 3 months*

- Built and styled responsive WordPress pages end-to-end with Elementor and custom CSS to match the visual design.

Projects

Job Application Tracker — Full-Stack App (Next.js, Supabase, Live) *job-tracker-rouge-three.vercel.app/?demo*

- Built a full-stack Kanban job tracker with Next.js, TypeScript, Tailwind CSS and Supabase: auth, CRUD, drag and drop, search, response-rate stats and CSV export.
- Designed the Postgres schema and row-level security policies so every user can only read and change their own records.
- Put data access behind one JobStore interface (Supabase or a no-signup demo mode) and covered the stats, search and CSV logic with Vitest unit tests.

Teddy Talk — Offline AI Teddy Bear (IoT + AI) *Python · FastAPI · Flutter · ESP32*

- Designed an offline-first system: ESP32-S3 firmware, a Flutter Android app and a FastAPI backend running speech-to-text (Faster-Whisper), an LLM (Ollama, Llama 3.2) and text-to-speech (Piper) locally.
- Used BLE for pairing, commands and Wi-Fi provisioning, and WebSockets for live audio; kept device, app and backend in sync with versioned JSON schemas and SQLite storage.
- Added security controls, bounded low-latency audio queues, CI, resilience tests and release runbooks (v0.8.0).

Fusion Tech Dynamics — Company Website *fusiontechdynamics.com*

- Built a multi-page responsive company website (home, about, services, products, training, careers, contact) from design to deployment.
- Developed clean, reusable sections and navigation; optimized layouts for desktop, tablet, and mobile.
- Deployed as a static site on Cloudflare Pages with SEO essentials (sitemap, robots, redirects).

The Real Leather Co — E-commerce Store (HTML, CSS, JS) *therealleathercompany.com*

- Built a leather-goods online store during my internship, replicating a reference design into a clean, responsive layout with HTML, CSS, and JavaScript.
- Implemented product catalog, product cards, grids, navigation, and a cart/checkout interface with a consistent, brand-focused look.
- Tested across devices and browsers to keep spacing, typography, and responsiveness consistent.

Winklez — Shopify Store (Kitchen Tools) *Shopify · Liquid*

- Built and customized a Shopify store for a kitchen-tools brand — collection pages, product pages, about, contact, and FAQ.
- Edited Liquid theme sections and templates, and used the Shopify CLI to pull and push theme changes.
- Kept a consistent, brand-focused layout across pages and prepared product assets for the store.

Media Grabber — Android App *Kotlin · Jetpack Compose*

- Built an on-device Android media downloader with Kotlin and Jetpack Compose, including a floating bubble that reads a copied link.
- Designed the app UI — home screen, quality-picker sheet, and download progress — and matched supported links (YouTube, Instagram, TikTok, Facebook).

Face Gesture Scroll — Python, OpenCV, MediaPipe *Personal Project*

- Built a hands-free desktop scrolling tool that reads head and face movements from the webcam to scroll and swipe.
- Used MediaPipe for landmark tracking and OpenCV for real-time video processing, with a short calibration step.

Education & Certifications

B.S. Computer Science Iqra University, Islamabad | Graduated 2025

- Web Developer Internship Certificate — Volpea Solutions, 2025 (3 months).

Additional

- Portfolio with live demos and case studies: muneebuddinzamir-bit.github.io
- Use AI coding assistants to work faster, but I review and understand every line before commit and can explain all of my code.
- **Languages:** English (professional, written & verbal), Urdu (native).
