github.com/muneebuddinzamir-bit · linkedin.com/in/muneeb-ud-din-0258a235

Front-end developer who turns Figma and reference designs into fast, responsive, pixel-accurate websites, with experience across WordPress and WooCommerce (including a headless Next.js store), Shopify (Liquid) and React/Next.js. Focused on clean, reusable code, cross-browser testing and on-page SEO.

SKILLS

CMS & E-commerce	WordPress, WooCommerce (Store API, WP-CLI, plugins), Elementor, Shopify (Liquid, CLI)
Front-end	HTML5, CSS3, JavaScript (ES6+), React (hooks, state, props), Next.js, Tailwind CSS
Design to code	Figma to responsive layouts, accurate spacing & typography, Flexbox, CSS Grid, mobile-first
Back-end	PHP (WordPress), Supabase (Postgres, auth, RLS), Node.js/Express REST APIs, MongoDB
SEO & delivery	Sitemaps, robots, redirects, meta tags, page speed; Git, Docker, Cloudflare Pages, Vercel

EXPERIENCE

Junior Front-End Developer · Fusion Tech Dynamics, Islamabad — Jan 2026 – Present

- Build responsive pages for an internal Next.js dashboard, turning Figma designs and tickets into working UI.
- Create reusable React components (tables, forms, cards, modals, navigation) matched to Figma on every screen.
- Connect pages to REST APIs with loading and error states; test across browsers and fix layout and validation issues.

Freelance Front-End Developer · Self-employed — 2025 – Present

- Build and style responsive web pages for clients with HTML, CSS, JavaScript and React, from brief to delivered code.

Web Developer Intern · Volpea Solutions — 2025 · 3 mo

- Built website components in a production codebase; joined cross-browser testing and kept clear handoff docs.

WordPress Trainee · Logics Buffer — 2025 · 3 mo

- Built and styled responsive WordPress pages end-to-end with Elementor and custom CSS to match visual designs.

PROJECTS

Dewlune: Headless WooCommerce Store · Next.js, TypeScript, WooCommerce, PHP, Docker — Live demo

- Next.js storefront whose catalog, cart and cash-on-delivery checkout run on the WooCommerce Store API.
- Cart token kept in an httpOnly cookie via server routes; Docker + WP-CLI setup and a custom WordPress plugin.

Fusion Tech Dynamics: Company Website · HTML, CSS, JS, Cloudflare Pages — fusiontechdynamics.com

- Built a 7-page responsive company website from design to deployment, with reusable sections and navigation.
- Added SEO essentials (sitemap, robots, redirects) and a working contact form.

Job Application Tracker: Full-Stack App · Next.js, TypeScript, Tailwind, Supabase — Live demo

- Auth, a job status board and full CRUD; designed the Postgres schema and row-level security so each user only sees their own records.

The Real Leather Co: E-commerce Storefront · HTML, CSS, JavaScript — GitHub

- Built a storefront from the brand's reference design: catalog, product cards, navigation, cart and checkout UI.

Winklez: Shopify Store · Shopify, Liquid

- Built a kitchen-tools store (collection, product and FAQ pages); edited Liquid sections and templates via Shopify CLI.

More · Media Grabber (Android, Kotlin, Jetpack Compose) · Face Gesture Scroll (Python, OpenCV, MediaPipe)

EDUCATION

B.S. Computer Science · Iqra University, Islamabad — Graduated 2025

Web Developer Internship Certificate (Volpea Solutions, 2025) · Languages: English (professional), Urdu (native)
